Colorker

---

TODO EL MUNDO  
TIENE UN  
AZULEJO QUE LE  
REPRESENTA

---

Esta es la convicción que unió a un grupo de emprendedores provenientes de la industria cerámica en 1987 y les motivó a crear Colorker®.

¿Cómo se cumple un objetivo tan ambicioso? Prestando atención a las necesidades, las emociones y las preferencias más profundas de las personas. Investigando e innovando tanto en el terreno técnico como estético. Y con la confianza que otorga el aval de las principales certificaciones europeas y la participación en proyectos de todas las envergaduras a lo largo y ancho del planeta.

La máxima de Colorker® es permitir tanto a profesionales como a particulares la posibilidad de expresarse a través de la cerámica.

Tenemos todo lo necesario para que puedas contarle al mundo a través de la cerámica quién eres y cómo quieres sentirte.

Te estamos escuchando, imagina un azulejo.

*Every person in the world has a tile that represents it. This is the conviction that brought together a group of entrepreneurs from the ceramics industry in 1987 and which motivated them to create Colorker®.*

*Colorker® is a ceramics company whose maxim is to allow both professionals and individuals to be able to express themselves through ceramics.*

*How do we accomplish such an ambitious objective? We pay attention to our clients' deepest needs, emotions and preferences. We research and innovate both in technique and in aesthetics. And we have the confidence granted by the endorsement of the main European certification bodies and participation in all sorts of major projects throughout the width and the breadth of the planet.*

*We have everything you need so that you can tell the world who you are and how you want to feel through ceramics. We're listening to you, just imagine a tile.*

**Colorker®**  
*imagine a tile*

---

## LA CONFIANZA, NUESTRO MEJOR AVAL

---

La confianza es algo que se logra con dificultad y se pierde con facilidad. Por eso para nosotros es un objetivo permanente la obtención de certificados oficiales que avalen nuestros procesos y nuestro producto. Así podemos fijar siempre objetivos de mejora en los que todos nuestros departamentos están implicados.

Estos son nuestros principales certificados hasta el momento:

*Trust is the best guarantee.*

*Confidence is something that is difficult to achieve, but easy to lose. That is why we are always trying to obtain official certifications that endorse our processes and our products. Thus, we can always set objectives for improvement for each of the departments that are involved.*

*These are our main certifications to date.*

---

## LA INNOVACIÓN FORMA PARTE DE NUESTRO ADN

---

La innovación forma parte de nuestro ADN desde nuestros orígenes. La investigación para la mejora continua de productos, sistemas de instalación, procesos y, en definitiva, de todos los aspectos de nuestra área de trabajo, es un factor imprescindible para competir en un mundo globalizado.

Por eso el espíritu innovador está presente en las actuaciones de todos nuestros departamentos. Como en el de Diseño y Desarrollo de Productos, que investiga y aplica las nuevas propuestas estéticas y las técnicas de fabricación cerámica más punteras. O en Tecnología, nuestro departamento de Consultoría y Ejecución de Aplicaciones Cerámicas, que tiene como objetivo ofrecer soluciones constructivas que satisfagan las necesidades del profesional.

*Innovation has formed part of our DNA ever since the beginning. Research into continuously improving our products, installation systems, processes and, ultimately, all of the aspects of our business, is an indispensable factor for competing in a globalised market.*

*That is why the innovative spirit is present in the performances of each of our departments. This is especially true in the Product Design and Development Department, which researches and applies the latest aesthetic and technical ceramics manufacturing techniques. The same is true for Tecnología, our Ceramics Applications Consultation and Execution department, which aims to offer building solutions that satisfy professionals' needs.*

---

## SOLUCIONES A MEDIDA DE TUS PROYECTOS

---

Desde Tecknología, nuestro departamento de Consultoría y Ejecución de Aplicaciones Cerámicas, ofrecemos soluciones constructivas que resuelven las necesidades de los profesionales del mundo de la arquitectura, la decoración y la construcción.

Estos son los principales sistemas para solucionar el revestimiento de fachadas desarrollados por Tecknología:

### TÉCNICA FV

Fachadas ventiladas con sistema visto. Se utilizan anclajes mecánicos que quedan a la vista tras la colocación de las piezas mecanizadas.

Fachadas ventiladas con sistema oculto. Las fijaciones mecánicas con las que se aseguran las piezas quedan ocultas cuando la fachada está finalizada.

### TÉCNICA FM

Fachadas cuya colocación requiere el uso de una fijación química con cemento cola y un anclaje mecánico de grapa de seguridad no visible tras el rejuntado. Esta fijación de seguridad está patentada por Colorker®.

### TÉCNICA FP

Fachadas que se solucionan utilizando fijación química de cemento cola.

*Customized solutions to your project.*

*From Tecknología, our Ceramics Applications Consultation and Execution department, we offer building solutions that solve the needs of professionals from the realms of architecture, decoration and construction.*

*These are the main systems for finding a solution to the coating of façades developed by Tecknología:*

### *FV TECHNIQUE*

*Ventilated façades with a visible system. Mechanical fasteners are used that remain visible after the machined pieces are placed down.*

*Ventilated façades with a hidden system. The mechanical fasteners which secure the pieces are hidden from view when the façade is finalised.*

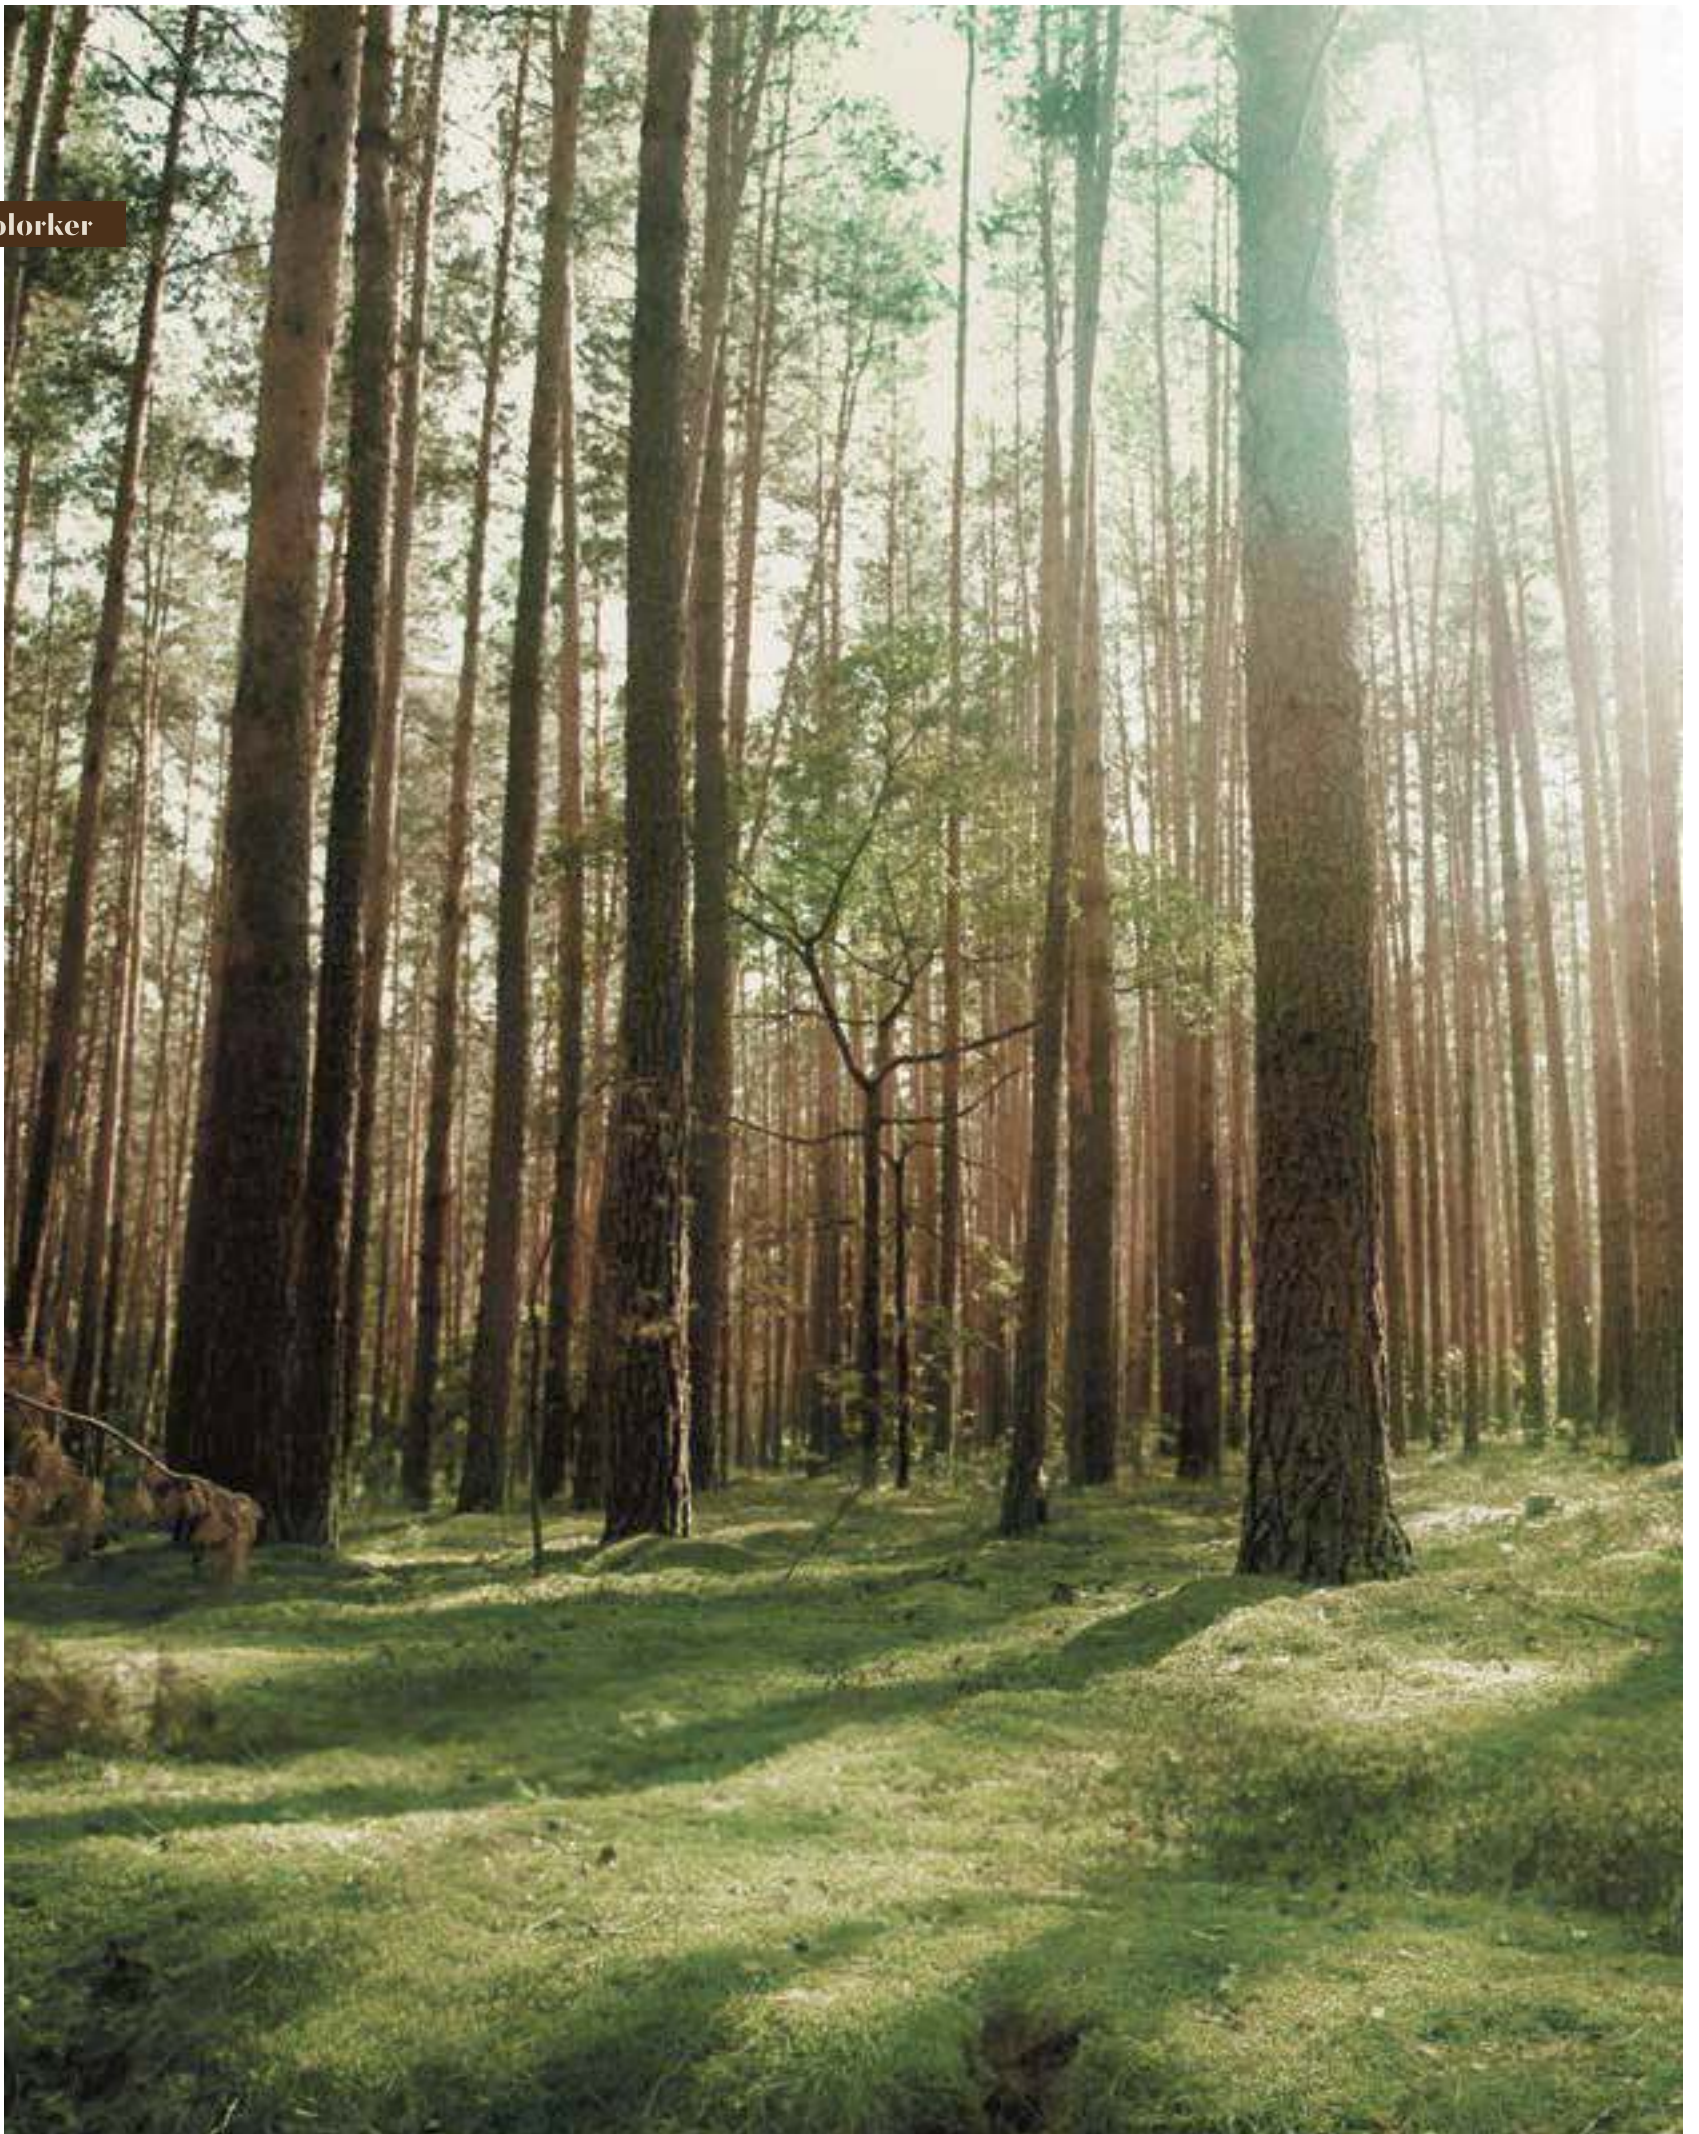

### *FM TECHNIQUE*

*Façades whose placement requires the use of a chemical fastener with cement glue and a safety grip mechanical fastener that is not visible after grouting. This safety fastener is patented by Colorker®.*

### *FP TECHNIQUE*

*Façades that use a chemical fastener consisting of cement glue.*

## SOMOS ADICTOS A LA NATURALEZA

---

Somos adictos a la naturaleza. Por eso la reducción del impacto medioambiental de nuestra actividad va más allá de nuestras propias instalaciones gracias al diseño de productos que contribuyen a reducir el consumo energético.

Estos son algunas de las áreas en las que incide nuestro Plan de Gestión Ambiental y que nos ha permitido obtener el reconocimiento de la etiqueta ecológica ISO 14021 y la Autorización Ambiental Integrada (norma Española que garantiza el cumplimiento de la Ley que vela por la protección del medio ambiente y la salud de las personas):

- ♦ Máximo cuidado de los recursos naturales y materias primas, optimizando su uso y minimizando los residuos.
- ♦ Tratamiento de los residuos previamente minimizados para que no resulten perjudiciales a las personas o al ambiente.
- ♦ Plan de reciclaje personalizado para cada una de nuestras factorías.
- ♦ Estudios regulares para la mejora medioambiental.

*We are addicted to nature. That is why the reduction of the environmental impact of our activities goes beyond our own facilities thanks to the design of our products, which contribute to reducing energy consumption.*

*These are a few of the areas protected by our Environmental Management Plan and which have allowed us to obtain recognition from the ecological label ISO 14021 and Integrated Environmental Authorisation (a Spanish standard that guarantees compliance with the Law on Environmental and Human Health Protection):*

- ♦ *Maximum care with regards to natural resources and raw materials, optimising their use and minimising waste.*
- ♦ *Treatment of previously minimised waste so that it is not hazardous to people or to the environment.*
- ♦ *Custom recycling plan for each of our factories.*
- ♦ *Regular studies for environmental improvement.*

# CONSEJOS DE COLOCACIÓN

*Advise of laying*

## PREPARACIÓN DEL SOPORTE

La colocación de baldosas cerámicas siempre debe ser realizada por personal profesional experimentado.

Deben elegirse las herramientas y útiles adecuados. **Las superficies, tanto de suelos como de paredes, deben estar perfectamente niveladas**, pudiéndose emplear morteros de regulación o nivelación, incluso capas impermeabilizadoras, de drenaje, etc, si la situación lo requiere. **Las superficies deben estar totalmente limpias antes de aplicar el mortero de agarre o el adhesivo.** Utilizar una adecuada iluminación, recomendándose la utilización de lámparas o focos para observar el ajuste dimensional.

## PREPARATION FOR THE TILE SETTING

*The laying of ceramic tiles must always be carried out by an experienced professional.*

*Always use the appropriate tool and equipment.*

*The surfaces, whether it be floors or walls, must be perfectly levelled.*

*For this purpose, a regulating or levelling mortar can be used, or even waterproofing or drainage layers, etc, if the situation requires it.*

*The surfaces must be completely clean before applying the mortar or the adhesive. Use adequate lighting, the use of lamps or spotlights is recommended in order to see clearly the dimensional alignment.*

## ELECCIÓN DEL ADHESIVO Y SISTEMA DE COLOCACIÓN

La elección del adhesivo viene definido por el tipo de baldosa cerámica (el grupo al que pertenece y el formato), por el tipo de la superficie a revestir (material) y por el uso del recinto.

La elección del sistema de colocación depende de la ubicación de la obra (exterior o interior) y de las dimensiones de la baldosa cerámica.

Se recomienda consultar con su distribuidor COLORKER.

Se recomienda una colocación en capa fina frente a la colocación en capa gruesa.

Se recomienda realizar doble encolado para baldosas que tengan alguno de sus lados con una longitud superior a 30 cm. Esta técnica se realiza aplicando adhesivo tanto en el soporte como en la baldosa, cubriendo toda la superficie de las mismas.

## CHOICE OF ADHESIVE AND AND METHOD OF APLICATION

*The choice of adhesive is defined by the type of ceramic tile (The group to which it belongs and its format), the type of surface lo be covered (material) and the purpose of the tiled area.*

*The choice of tiling method depends on the location of the site (outside or inside) and the dimensions of the ceramic tiles.*

*It is recommended to contact the dealer and to follow the instructions of the manufacturer.*

*It is recommended to use a fine layer as opposed to a generous one.*

*It is recommended to use double the adhesive with those tiles which have one or more sides longer than 30cm. This technique is achieved by placing adhesive both on the tile setter and on the tile, completely covering their surface.*

## CUIDADOS ESPECIALES DURANTE LA COLOCACIÓN

Utilizar crucetas o estrellas de tamaño adecuado según la junta para mantener la ortogonalidad del montaje.

En colocaciones trabadas o a contrapunta se recomienda que esta no supere el 15% de la longitud del lado más largo.

Comprobar el material ya colocado cuando el adhesivo está todavía fraguando con el fin de corregir pequeñas variaciones.

#### SPECIAL CARE DURING SETTING

Use crosses or stars of the appropriate size according to the joint, in order to maintain the orthogonality of the setting.

If to be set in a brickwork style or at a counterpoint, it is recommended not to surpass 15% of the longest side.

Check the material applied while the adhesive is still setting, in order to correct small variations.

#### EL REJUNTADO

Las juntas son un elemento necesario para la conservación de las instalaciones.

Existen varios tipos de juntas en una obra:

##### A. Juntas estructurales:

Están diseñadas para absorber los movimientos de la edificación y siempre deben respetarse. Pueden ser tapadas con perfiles adecuados y llenadas con materiales indicados.

##### B. Juntas perimetrales:

En todas las uniones pared-suelo. El ancho mínimo será de 8 mm. y deben de estar vacías o rellenas con material deformable. Son disimulables con el rodapié o el azulejo de pared.

##### C. Juntas de colocación:

Es la separación que se deja entre las baldosas. Se considera colocación con junta cuando la separación es mayor o igual de 3 mm, y separación sin junta cuando es menor de 3 mm, debiendo dejar siempre una separación mínima de 1,5 mm.

Antes de iniciar el rejuntado, esperar que el mortero de agarre o el adhesivo este totalmente endurecido.

Las juntas tienen que estar limpias y exentas de polvo y partículas.

Efectuar el relleno o sellado de las juntas utilizando una llana de goma dura, sin dejar vacíos los desniveles.

Eliminar el exceso de junta de la superficie moviendo la llana diagonalmente a las juntas, cuando la mezcla este todavía fresca.

Retirar los residuos con la misma espátula.

Es importante consultar con el distribuidor para elegir la junta adecuada al tipo de baldosa y el color que se quiera utilizar por estética.

Siga siempre las indicaciones de su distribuidor COLORKER.

#### GROUTING

The joints are a necessary element for the conservation of the premises.

There are various types of joints in a site:

##### A. Structural Joints:

These are designed to absorb movements in the building and must always be respected.

They can be covered with adequate profiles and filled with the indicated materials.

##### B. Perimeter Joints:

All joints where the wall meets the floor. The minimum width will be 8mm and must be empty or filled with a deformable material. They can be concealed with the skirting board or the wall tile.

##### C. Setting Joints:

These are the spaces left between tiles. The setting will be considered to have a joint when the space between each tile is greater than or equal to 3mm. For spaces of less than 3mm, there is considered to be no joint. There should always be a minimum gap of at least 1.5mm.

Before starting to apply the grout around the tiles, ensure that the mortar or adhesive is completely hard.

The joints must be completely clean and free from dust and particles.

Refill or seal the joints with grout using a grout float of hard rubber, without leaving spaces or uneven levels.

Remove any excess grout from the surface by moving the grout float in a motion diagonal to the joints, while the mixture is still fresh. Remove any residue with the same spatula. It is important to consult the dealer when choosing the grout that is adequate for the tile and the colour that is the most aesthetically appealing.

Always follow the instructions of the manufacturer.

#### TERMINACIÓN DE LA OBRA

Una obra no está acabada hasta que no está entregada.

##### Limpieza de las juntas:

Respetando los tiempos del fabricante, limpiar con un trapo de hilo húmedo toda la superficie, incluido el rejuntado. Al secar puede quedar una capa o velo en toda la superficie, que puede ser limpiada con agua. No dejar pasar mucho tiempo para limpiar los restos de juntas.

Limpiar los restos de obra con productos adecuados.

Consultar con el distribuidor y nunca emplear productos que contengan Ácido Fluorhídrico HF.

Protección de las superficies realizadas para evitar impactos, abrasiones, etc.

El mantenimiento de las baldosas cerámicas es sencillo y cómodo.

Se pueden emplear productos específicos para cada tipo de baldosas respetando las indicaciones del fabricante de productos.

Consulte con el distribuidor.

Se aconseja al colocar, mezclar piezas de varias cajas. Verificar antes de colocar: Tonalidad, Calibre y Clase. No se admiten reclamaciones referentes al material colocado.

#### FINISH THE JOB

The job is not over until it has been fully completed.

##### Cleaning the joints:

Respect the times advised by the manufacturer, clean the whole surface with a damp linen cloth, including the grout.

When drying there may appear a veil or coating on the surface, this can be cleaned with water.

Do not wait too long before cleaning the remaining joints.

Clean the rest of site with the appropriate products.

Contact the dealer and never use products that contain Hydrofluoric Acid HF.

Protect the surfaces already set against impacts, abrasions, etc.

Maintenance of ceramic tiles is easy and convenient. Specific products can be employed for each type of tile. Carefully follow the instructions of both the manufacturer of the tiles and the manufacturer of the products. Contact the dealer for advice.

It is advised on having placed to mix pieces of several boxes. To check before placing the tonality, the calibre and the class. Are not admitted claims relating to the placed material.

# CONSEJOS DE COLOCACIÓN

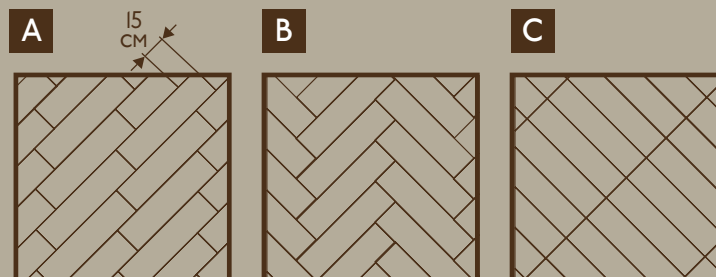

*Advise of laying*

## PARA LAS SERIES DE MADERA

Para la correcta colocación de los productos cerámicos, es necesario que tanto las superficies HORIZONTALtas como verticales, estén completamente planas y sin presencia de residuos.

Como material de agarre se utilizarán cementos cola especiales para porcelánicos, aplicándose doble encolado en pieza y soporte, extendiéndose con llana dentada.

Por las características rectangulares de las piezas y similitud con la madera natural, se aconsejan las colocaciones siguientes:

## FOR THE WOOD SERIES

*In order to correctly lay the ceramic products, it is necessary to have HORIZONTALtal and vertical surfaces completely flat and without any residues.*

*For porcelain materials, special quick-drying must be used as the adhering material, using double spread gluing on both the piece and the stand, and applying it with a square notch trowel.*

*Due to the rectangular nature of the pieces and their likeness to natural wood, we recommend the following laying process:*

## PARA LOS ACABADOS METÁLICOS

USO: Pavimento y revestimiento. Zonas de tránsito moderado.

MANTENIMIENTO: Proteger de los agentes abrasivos externos y de la suciedad que se acumula en felpudos y escaleras.

Evitar contactos prolongados con ácidos.

## LIMPIEZA

1. Barrer o aspirar la superficie de polvo o pequeños restos de suciedad.
2. Seguidamente fregar con una disolución de lavado utilizando un agente limpiador en la dosis recomendada por el fabricante.
3. Utilizando una fregona, se pueden dar dos pasadas: la primera, normal con mayor cantidad de disolución de lavado. Posteriormente, escurriendo más la fregona realizar una segunda pasada.

## FOR METALLIC FINISHES:

*USE: Surfacing and coatingModerate transit areas.*

## MAINTNANCE:

*Protect from external abrasive agents and from dirt accumulated in doormats and stairs. Avoid long-standing contact with acids.*

## CLEANING

1. Sweep or vacuum dust and small bits of dirt from the surface.
2. Then, wash with a washing solution using a cleaning product with the mufacturer's recommended dose.
3. It's convenient to mop twice: the first time, with a higher amount of washing solution. Then, a second time, wringing out the mop further.

## PARA LAS GRANILLAS PULIDAS:

USO: Pavimento y revestimiento. Zonas de tránsito moderado.

### COLOCACIÓN:

1. Antes de la colocación, extender varias piezas para obtener una superficies mínima de unos 9 m<sup>2</sup>, y comprobar el efecto estético final, usando piezas mezcladas de varias cajas.
2. No marcar con lápiz ni con rotulador la superficie de las balosas.
3. Para el corte del material se recomiendan máquinas eléctricas con discos para porcelánicos, refrigerado por agua para los cortes rectos y radial para los curvos.
4. Mientras dure la obra, proteger la superficie con cualquier medio adecuado para garantizar el brillo y evitar que se raye o deteriore.
5. Usar un cemento cola específico.
6. Para colocar e igualar las piezas usar una maza de goma blanca, nunca negra o gris.
7. En los rectificadas se recomienda dejar una junta mínima de 0.5 mm.
8. Una vez rejuntado, limpiar la superficie inmediatamente con una esponja húmeda antes del endurecimiento definitivo del material de rejuntar.

### LIMPIEZA:

Limpiar con un paño húmedo y alcohol de quemar las piezas después de su colocación.

Para su mantenimiento se recomienda usar una mopa seca sin aplicar productos cerosos.

### FOR POLISHED FINISHES:

USE: Surfacing and coating. Moderate transit areas.

### PLACEMENT:

1. Before placement, extend several pieces using different and mixed boxes to obtain a minimum surface of 9 sq. m, in order check the final aesthetic effect.
2. Do not mark the surface of the tiles with pencil or pen.
3. To cut the material watercooled electrical machines with disks for porcelain are recommended.
4. During the work, cover the surface with any appropriate means to protect the brightness and to avoid scratching or damage.
5. Use a specific adhesives for porcelain tiles.
6. To place and match the pieces use a white rubber hammer, never black or grey.
7. For rectified tiles a minimum joint of 0.5 mm is recommended.
8. After grouting, clean the surface immediately with a damp sponage before definitive hardening of grouting material.

### CLEANING:

After placement clean with a damp cloth and denatured alcohol. For maintenance, it is recommended to use a dry dust cloth without applying any waxy products.

Colorlker no se hace responsable ante cualquier otro tipo de colocación.

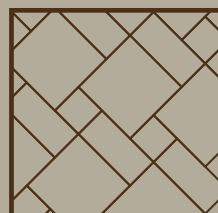

Colorlker is not responsible for alternative methods used when installing this product.

## EJEMPLOS DE COMBINACIÓN DE FORMATOS:

SOME EXAMPLES OF SIZE COMBINATIONS:

A continuación recomendamos algunos ejemplos de combinaciones de formatos indicando el porcentaje de piezas necesarias en cada caso.

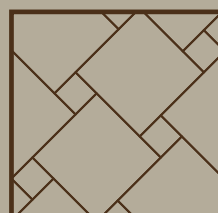

Hereunder we recomend you some examples of different sizes combination showing the percentage of pieces needed in each case.

### 1. VENETO\*

(45 x 45 + 22 x 22 + 22 x 45)

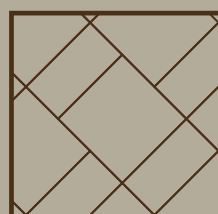

- ◆ 45 x 45 = 58%
  - ◆ 22 x 22 = 14%
  - ◆ 22 x 45 = 28%
- (\*). Recomendado instalar con junta de 5 mm. It is recommended to install with 5 mm joint

### 2. STUDIO I / VÍA TERRA

(60 x 60 + 19,7 x 19,7)

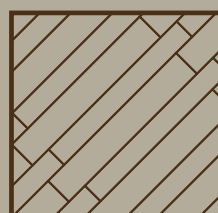

- ◆ 60 x 60 = 90%
- ◆ 19,7 x 19,7 = 10%

### 3. VARIOS

(60 x 60 + 30 x 60)

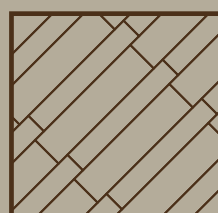

- ◆ 60 x 60 = 67%
- ◆ 30 x 60 = 33%

### 4. WOODSOUL

(119,7 x 19,5 + 119,7 x 14,5)

- ◆ 119,7 x 19,5 = 57%
- ◆ 119,7 x 14,5 = 43%

### 5. ETERNAL WOOD / TUNDRA

(89,3 x 22 + 89,3 x 14,5)

- ◆ 89,3 x 22 = 60%
- ◆ 89,3 x 14,5 = 40%
